## ⚠ WARNING

Serious personal injury could result if this product is used improperly.

1104

- Do not exceed dolly capacity. Uniformly distribute loads on dolly.
- Do not move unstable loads or loads that cause dolly to roll or tip. Secure load to dolly, e.g. with ratchet straps.
- Retention plate (yellow) has 2 slots. Slots look like upside-down 7's. When bolts in tops of slots, retention plate is lowered. Only lower plate if load longer than dolly. Put plate up for all other loads. Rest load against plate.
- Dolly does NOT have brakes.
  - i. Gradually slow down. Momentum might cause dolly/load to collide with tow vehicle or person pulling dolly.
  - ii. If pulling dolly by hand, stand to side of dolly when slowing.
  - iii. Always remain upslope from dolly whenever traversing non-level terrain.
