Receiving instructions:

After delivery, remove the packaging from the product. Inspect the product closely to determine whether it sustained damage during transport. If damage is discovered, record a complete description of it on the bill of lading. If the product is undamaged, discard the packaging.

NOTE:
The end-user is solely responsible for confirming that product design, use, and maintenance comply with laws, regulations, codes, and mandatory standards applied where the product is used.
Signal Words:

This manual uses SIGNAL WORDS to direct the reader’s attention to important safety-related messages. These messages describe uses of the product that could result in personal injury or property damage. Each signal word connotes a specific hazard level. The following are definitions of signal words used in this manual.

- **DANGER**: Identifies a hazardous situation which, if not avoided, WILL result in DEATH or SERIOUS INJURY. Use of this signal word is limited to the most extreme situations.
- **WARNING**: Identifies a hazardous situation which, if not avoided, COULD result in DEATH or SERIOUS INJURY.
- **CAUTION**: Indicates a hazardous situation which, if not avoided, COULD result in MINOR or MODERATE injury.
- **NOTICE**: Identifies practices likely to result in product/property damage, such as operation that might damage the product.

Hazards of Improper Use:

Vestil strives to identify all foreseeable hazards associated with the use of its products. However, material handling is dangerous and no manual can address every conceivable risk. Ultimately, the most effective way to prevent injury is to apply sound judgment whenever using this device.

- **WARNING**: Improper or careless use could result in serious personal injuries or death.
  - Before using the coil carrier, you must contact the manufacturers of all forklifts that will use the carrier to request: 1) written approval; and 2) markings for each forklift that identify the coil carrier AND give the approximate weight of the forklift and carrier at maximum elevation with a laterally-centered load. **DO NOT use the carrier until your forklifts are marked.**
  - Read and understand the entire manual before installing, using, or servicing the product. Read the manual to refresh your understanding of proper use, inspection, and maintenance procedures whenever necessary.
  - DO NOT exceed the capacity of your unit (see Label 287 on product; also shown in “Labeling diagram” on p. 5).
  - Inspect the carrier before each use as described in “Inspections” on p. 4.
  - Always connect the safety chain to the carriage of your forklift without slack. The carrier must not be able to slide on the forks.
  - Verify that the load is stable by lifting it just a few inches off of the ground. Load swing should be minimal and the carrier should not shift on the forks. If the load is not stable while elevated, return it to the ground and use another device to transport it.
  - ALWAYS apply the rules governing use of (forklift) front end attachments applied at your work site.
  - DO NOT cover or remove any label. Verify the location and legibility of all labels shown in the Labeling Diagram on p. 5. DO NOT use this device UNLESS all labels are readable and undamaged.
  - DO NOT ride or sit on the carrier.
  - DO NOT use the carrier to push objects. Only use it to transport a coil of material.
  - ONLY use this product when traveling on firm, level, even ground.
  - Coil must not be longer than the pole, i.e. no part of the coil should hang over the end of the pole. See “Using the coil carrier” on p. 4 for loading instructions.
  - DO NOT leave elevated coils unattended. Always move the coil to its necessary location, remove it from the carrier, and properly immobilize it.
  - DO NOT modify the carrier in any way UNLESS you first obtain written approval from Vestil. Unapproved modifications automatically void the limited warranty (see p. 6) and might make the unit unsafe to use.
Specifications:

Dimensions, net weight (lost load), and uniform capacity of each CCF-series coil carrier are provided in the following diagrams and table.

<table>

Using the coil carrier:

Step 1: Drive forward and insert the forks of your lift truck into the fork pockets of the frame. Drive until the frame contacts the heels of the forks.

Step 2: To prevent the carrier from sliding on the forks, attach the safety chain (item 4 on p. 3) to the carriage of your lift truck without slack. NOTE: In the photo (right), the slack must still be taken out of the safety chain.

Step 3: Insert the pole into the center of a coil of material. Drive forward until the end of the roll contacts the frame gussets.

Step 4: Raise the forks only as high as necessary to lift the coil off of the ground and to avoid contact with objects during transport. DO NOT leave a raised coil unattended. Always unload the carrier before leaving the forklift.

Inspections:

写的记录 — 在使用携带器之前，制作一份外观记录。描述叉管、杆、框架、安全链和卸扣的状况。为每个项目拍摄照片并添加到记录中。记录所有标签的拍摄。记录中需标明每个标签的位置。这个记录建立了正常条件。在执行下述详细检查时，将你的观察与记录进行比较，以判断部件是否处于正常条件。如果不使用携带器，正常条件不改变。外观变化，如损坏的油漆/粉末涂层，不构成正常条件的变化。但是，一旦发现损坏，应使用触摸漆修补所有受影响的区域。

Before each use — 进行下列检查。

1. 检查携带器的表面，查看是否有污物或其它物质。
2. 检查紧固件（卸扣和快速连接）的完整性。
3. 异常、不稳定或在使用过程中噪声。
4. 检查基架、杆和叉管的松动、磨损、损坏和金属疲劳。
5. 检查叉管的状况，如严重磨损、薄壁、显著腐蚀和变形。
6. 确认安全链处于良好状态。查看是否有断裂、拉长和扭曲的链接。
7. 检查所有标签（见“标签图”在p. 5）。替换损坏或不易阅读的标签。
8. 检查整个结构的锈蚀/金属侵蚀。用钢丝刷或钢丝绒清洁区域，然后使用触摸漆修补。

Annual evaluation — 至少每年一次，授权的检验人员应该使用携带器提升满载。之后，进行频繁的检查以确认产品处于正常条件。

Maintenance:

End-users should implement a maintenance program to ensure that the product functions properly and is adequately maintained. The OSHA “General Industry” standard for “Powered industrial trucks” (29 CFR 1910.178) provides recommended maintenance procedures. The following steps should be utilized in conjunction with those procedures. ONLY trained, authorized personnel or contractors should perform inspection, maintenance, or repair work.

NOTE: The end-user is responsible for selecting and training employees to work on the carpet ram. “Work on” means use, inspect, and maintain the product.

Step 1: Tag the ram, “Out of Service.”

Step 2: Remove any dirt or other matter from all surfaces.

Step 3: Conduct a “Before each use” inspection. If deformity, corrosion, rusting, or excessive wear is found, DO NOT use the product. Permanently remove it from service.

Step 4: Perform all necessary adjustments, replacements, and/or repairs. DO NOT modify the ram.

NOTE: The difference between necessary adjustments/repairs and modifications is important. An “adjustment” is a simple repair that restores the carrier to normal condition, such as tightening loose fasteners, or removing dirt or other debris from the surface. “Repair” refers to removing worn parts and installing replacement parts. A “modification” is a change that alters the carrier from original condition, like bending a structural member or removing a part or several parts. NEVER modify the unit without first obtaining express, written approval from Vestil. Modifications and automatically void the limited warranty (see p. 5) and might make the device unsafe to use.

Step 5: Make a dated record of all repairs, adjustments, and/or replacements.
Labeling Diagram:

The product should be labeled as shown in the diagram below. Product labeling is subject to change without notice. Therefore, your unit as delivered might be labeled differently. Make sure that your written record (see “Inspections” on p. 4) includes descriptions and photos of all labels applied to your carrier. Replace any label that is damaged or not easily readable (e.g. faded or torn).

A: Label 1049 (Forklift must be properly marked)

**WARNING**

Improper use of this fork attachment might result in death or serious injury.

- Before using this fork attachment, US Federal regulation 29 CFR 1910.178 requires you to contact the manufacturer of your lift truck on request.
- 1. Written approval [29 CFR 1910.178(a)(4)]
- 2. Markings for (fork) lift truck that:
  - Identify the attachment;
  - Give approximate weight of truck and attachment at maximum evaluation with laterally-centered load. [29 CFR 1910.178(a)(5)].

- **DO NOT** use UNTIL lift truck is marked with corrected capacity tags. 1049

B: Label 287 (Model, serial no. capacity)

- **MODEL/MODELO/MODELE**
- **STATIC CAPACITY (evenly distributed)** __________ lbs.
- **CAPACITÀ STATICA (distribuita uniformemente)** __________ lbs.
- **CAPACITÉ STATIQUE (distribuée régulièrement)** __________ lbs.
- **SERIAL/SÉRIE/SÉRIE** __________ 287

C: Label 1001 (This Side Up)

**USE THIS SIDE UP ONLY**

D: Label 218 (Fasten safety chain to carriage)

**WARNING**

Improper use might result in death or serious personal injury. Attach device to fork carriage with safety chain/strap.

- Do not use UNTIL lift truck is marked with corrected capacity tags. 218

**ADVERTENCIAS**

El uso inapropiado puede resultar en muerte o heridas personales. Asegúrese de haber montado correctamente el montacargas.

- Lleve el montacargas hacia adelante hasta que las cuñas hagan contacto con los bordes del montacargas.
- Las cuñas deben quedar dispuestas de manera correcta. Luego, asegure la cadena de seguridad al montacargas.
- La cadena de seguridad debe estar ajustada y colocado en la cubierta de la puerta.
LIMITED WARRANTY

Vestil Manufacturing Corporation ("Vestil") warrants this product to be free of defects in material and workmanship during the warranty period. Our warranty obligation is to provide a replacement for a defective, original part covered by the warranty after we receive a proper request from the Warrantee (you) for warranty service.

Who may request service?

Only a warrantee may request service. You are a warrantee if you purchased the product from Vestil or from an authorized distributor AND Vestil has been fully paid.

Definition of “original part”? 

An original part is a part used to make the product as shipped to the Warrantee.

What is a “proper request”? 

A request for warranty service is proper if Vestil receives: 1) a photocopy of the Customer Invoice that displays the shipping date; AND 2) a written request for warranty service including your name and phone number.  Send requests by one of the following methods:

US Mail                    Fax         Email
Vestil Manufacturing Corporation (260) 665-1339 info@vestil.com
2999 North Wayne Street, PO Box 507 Phone  Enter “Warranty service request”
Angola, IN 46703 (260) 665-7586 in subject field.

In the written request, list the parts believed to be defective and include the address where replacements should be delivered. After Vestil receives your request for warranty service, an authorized representative will contact you to determine whether your claim is covered by the warranty. Before providing warranty service, Vestil will require you to send the entire product, or just the defective part (or parts), to its facility in Angola, IN.

What is covered under the warranty? 

The warranty covers defects in the following original, dynamic parts: motors, hydraulic pumps, electronic controllers, switches, and cylinders.  It also covers defects in original parts that wear under normal usage conditions ("wearing parts"), such as bearings, hoses, wheels, seals, brushes, and batteries.

How long is the warranty period? 

The warranty period for original dynamic components is 90 days. For wearing parts, the warranty period is 90 days. Both warranty periods begin on the date Vestil ships the product to the Warrantee.  If the product was purchased from an authorized distributor, the periods begin when the distributor ships the product.  Vestil may, at its sole discretion, extend a warranty period for products shipped from authorized distributors by up to 30 days to account for shipping time.

If a defective part is covered by the warranty, what will Vestil do to correct the problem? 

Vestil will provide an appropriate replacement for any covered part.  An authorized representative of Vestil will contact you to discuss your claim.

What is not covered by the warranty? 

The Warrantee (you) are responsible for paying labor costs and freight costs to return the product to Vestil for warranty service.

Events that automatically void the Limited Warranty. 

- Misuse;
- Negligent assembly, installation, operation or repair;
- Installation/use in corrosive environments;
- Inadequate or improper maintenance;
- Damage sustained during shipping;
- Collisions or other accidents that damage the product;
- Unauthorized modifications: Do not modify the product IN ANY WAY without first receiving written authorization from Vestil.

Do any other warranties apply to the product? 

Vestil Manufacturing Corp. makes no other express warranties. All implied warranties are disclaimed to the extent allowed by law. Any implied warranty not disclaimed is limited in scope to the terms of this Limited Warranty. Vestil makes no warranty or representation that this product complies with any state or local design, performance, or safety code or standard. Noncompliance with any such code or standard is not a defect in material or workmanship.
