

## THE ULTIMATE OUTDOOR MIRROR

Conventional Convex Mirrors  
Require 2 Mirrors to see both directions

Domevex® Mirrors Require only  
1 Mirror to see both directions

There's an Outdoor Traffic and Security Mirror that's up to the challenge of regional and seasonal high winds. Our Patented DomeVex® Mirrors were created to provide a 180 degree view in vertically mounted mirrors with adjustment. The viewing area is 3 times the coverage of a standard convex mirror. Three brackets evenly spaced is the best defence against Mother Nature.

This hybrid line of mirrors is the only convex style product that has a continuous flat border around the mirror for rigidity. These outdoor mirrors have high impact plastic backs contained in an aluminum "U" channel, with options for 1, 2, or 3 telescoping brackets.

Sizes - 16", 24", 32", & 42" Indoor and Outdoor models Available
