Receiving instructions:
After delivery, remove the packaging from the product. Inspect the product closely to determine whether it sustained damage during transport. If damage is discovered, record a complete description of it on the bill of lading. If the product is undamaged, discard the packaging.

NOTE:
The end-user is solely responsible for confirming that product design, use, and maintenance comply with laws, regulations, codes, and mandatory standards applied where the product is used.

Technical Service:
For answers to questions not addressed in these instructions and to order replacement parts, labels, and accessories, call our Technical Service and Parts Department at (260) 665-7586. The department can also be contacted online at http://www.vestilmfg.com/parts_info.htm.
Signal Words
This manual classifies personal injury risks and situations that might cause property damage with signal words. Signal words indicate the seriousness of injuries that might result if a particular act does, or does not, occur.

**DANGER**  Identifies a hazardous situation which, if not avoided, **WILL** result in DEATH or SERIOUS INJURY. Use of this signal word is limited to the most extreme situations.

**WARNING**  Identifies a hazardous situation which, if not avoided, **COULD** result in DEATH or SERIOUS INJURY.

**CAUTION**  Indicates a hazardous situation which, if not avoided, **COULD** result in MINOR or MODERATE injury.

**NOTICE**  Identifies practices likely to result in product/property damage, such as operation that might damage the boom.

Hazards
We strive to identify all hazards associated with the use of our products. However, material handling is dangerous and no manual can address every risk. The most effective way to avoid injury is for the end-user to exercise sound judgment whenever using this product.

**WARNING**  Material handling is dangerous. Improper or careless use of this device might result in serious personal injuries.
• Read and understand the entire manual before installing, using or servicing this fork attachment. Read the manual to refresh your understanding of proper installation, use, and maintenance procedures whenever necessary.
• DO NOT attempt to resolve problems with the attachment unless you are authorized to do so and are **certain** that it will be safe to use afterwards. Contact Technical Service if you are uncertain whether the attachment should be used.
• Always inspect the attachment before using it. DO NOT use it unless it is in **Original Condition**. If you notice damage to any part of the attachment including the nylon safety strap, tag the unit “Out of Service”. DO NOT use the attachment until it is restored to original condition.
• Only lift with this device. DO NOT use the attachment to pull/drag.
• DO NOT use this product to lift people.
• Rigging must be properly attached to the load and hook before lifting the load. Be certain that the load is balanced to avoid load swing.
• DO NOT leave an elevated load unattended.
• DO NOT use this attachment to lift (or move) a load that is unstable when elevated.
• DO NOT attempt to lift a load that weighs more than the capacity of the attachment OR the lift truck, **whichever is smaller**. The capacity of your attachment appears on tag 993. The tag is attached to the product as shown in the Labeling Diagram.
• DO NOT elevate any load more than a few inches above the ground except as necessary to avoid contact with objects in the path of travel.
• DO NOT raise a load over people or allow anyone to stand or reach beneath a suspended load.
• DO NOT modify this product in any way. A "modification" is a change that alters the product from original condition, like bending the hook plate or removing parts. **Unauthorized modifications automatically void the Limited Warranty (see p. 4) and might make the product unsafe to use.**
• Store the LM-HP in a dry location.

Labeling Diagram
The unit should be labeled as shown in the diagram. However, label content and location are subject to change so your product might not be labeled exactly as shown. Replace all labels that are damaged, missing, or not easily readable (e.g. faded). Order replacement labels by contacting Technical Service online at http://www.vestilmfg.com/parts_info.htm. Alternatively, you may request replacement parts and/or service by calling (260) 665-7586 and asking the operator to connect you to the Parts Department.

[Tag attaches to handle of unit via zip-tie]

Tag 993: Reverse side – Safety messages
Installing & Using the Attachment

This product is a fork attachment subject to Federal OSHA Rule 29 CFR 1910.178 (the “Rule”). The Rule states that you must request that either the manufacturer of your fork trucks, or a professional engineer, determine the attachment will affect the capacity, operation, and maintenance of your fork trucks. Plates, tags, labels, etc. affixed to the truck must be changed accordingly. The truck should also be marked to identify the attachment and to display the approximate weight of the truck and attachment combination at maximum elevation with load laterally centered.

**Installation:**
1) Adjust the positions of the forks to align with the fork receivers (see above diagrams); then slide the unit onto the forks. Keep the forks level. Position the LM-HP on the forks as necessary.
2) Attach the safety strap to the fork carriage of your lift truck. Wrap the safety strap around the fork carriage. Attach the hook at the free end of the safety strap to the safety strap. The strap must be wrapped around the carriage a sufficient number of times so that there is no slack in the strap. When properly attached, the strap should prevent the unit from sliding forward on the forks.

**Using the Device:**

Connect the load to the hook via appropriate rigging. The weight of the load must not exceed the capacity of the hook.

[NOTE: Capacity is cast on the surface of the hook. It is also displayed on tag 993. See Labeling diagram on p. 2.] Connect the load to the hook to minimize load swing when the load is lifted off of the ground. Swinging loads might cause injuries and/or damage equipment.

**Record of Original Condition**

Before putting the unit into service, make a record of its condition. Photograph both sides of the device. Take close photos of the hook, shackle, safety strap, and strap hook. Photograph both sides of tag 993. See Labeling Diagram. Measure the throat openings of both hooks. Collate the photos and written descriptions into a single file. This file...
Vestil Manufacturing Corporation ("Vestil") warrants this product to be free of defects in material and workmanship during the warranty period. Our warranty obligation is to provide a replacement for a defective, original part covered by the warranty after we receive a proper request from the Warrantee (you) for warranty service.

Who may request service? Only a warrantee may request service. You are a warrantee if you purchased the product from Vestil or from an authorized distributor AND Vestil has been fully paid.

Definition of “original part”? An original part is a part used to make the product as shipped to the Warrantee.

What is a “proper request”? A request for warranty service is proper if Vestil receives: 1) a photocopy of the Customer Invoice that displays the shipping date; AND 2) a written request for warranty service including your name and phone number. Send requests by one of the following methods:

<table>
<thead>
<tr>
<th>US Mail</th>
<th>Fax</th>
<th>Email</th>

<tbody>
<tr>
<td>Vestil Manufacturing Corporation</td>
<td>(260) 665-1339</td>
<td><a href="mailto:info@vestil.com">info@vestil.com</a></td>
</tr>
<tr>
<td>2999 North Wayne Street, PO Box 507</td>
<td>Phone (260) 665-7586</td>
<td>Enter “Warranty service request” in subject field.</td>
</tr>
</tbody>
</table>

In the written request, list the parts believed to be defective and include the address where replacements should be delivered. After Vestil receives your request for warranty service, an authorized representative will contact you to determine whether your claim is covered by the warranty. Before providing warranty service, Vestil will require you to send the entire product, or just the defective part (or parts), to its facility in Angola, IN.

What is covered under the warranty? The warranty covers defects in the following original, dynamic parts: motors, hydraulic pumps, motor controllers, and cylinders. It also covers defects in original parts that wear under normal usage conditions ("wearing parts"), such as bearings, hoses, wheels, seals, brushes, and batteries.

How long is the warranty period? The warranty period for original dynamic components is 90 days. For wearing parts, the warranty period is 90 days. Both warranty periods begin on the date Vestil ships the product to the Warrantee. If the product was purchased from an authorized distributor, the periods begin when the distributor ships the product. Vestil may, at its sole discretion, extend a warranty period for products shipped from authorized distributors by up to 30 days to account for shipping time.

If a defective part is covered by the warranty, what will Vestil do to correct the problem? Vestil will provide an appropriate replacement for any covered part. An authorized representative of Vestil will contact you to discuss your claim.

What is not covered by the warranty? The Warrantee (you) is responsible for paying labor costs and freight costs to return the product to Vestil for warranty service.

Events that automatically void this Limited Warranty.
- Misuse;
- Negligent assembly, installation, operation or repair;
- Installation/use in corrosive environments;
- Inadequate or improper maintenance;
- Damage sustained during shipping;
- Collisions or incidental contacts causing damage to the product;
- Unauthorized modifications: DO NOT modify the product IN ANY WAY without first receiving written authorization from Vestil. Modification(s) might make the product unsafe to use or might cause excessive and/or abnormal wear.

Do any other warranties apply to the product? Vestil Manufacturing Corp. makes no other express warranties. All implied warranties are disclaimed to the extent allowed by law. Any implied warranty not disclaimed is limited in scope to the terms of this Limited Warranty. Vestil makes no warranty or representation that this product complies with any state or local design, performance, or safety code or standard. Noncompliance with any such code or standard is not a defect in material or workmanship.
