SAFE USE RECOMMENDATIONS

Before using the pallet lifter, read and understand the entire manual to insure safe operation. Inspect the unit including warning labels before each use for damage. Only use the lifter if it is in normal operating condition.

This Overhead Pallet Lifter is to be used in conjunction with an overhead hoist with the proper capacity only. The pallet lifter weight needs to be added into the total weight of the load.

WARNING! Material handling is dangerous. Improper use of this lifting device might result in serious personal injuries.

- DO NOT exceed rated capacity of lifter.
- DO NOT use lifter if damaged, malfunctioning, or missing parts.
- DO NOT lift people or lift loads over people.
- DO NOT elevate load higher than necessary.
- DO NOT leave a suspended load unattended.
- Stay clear of suspended loads.
- DO NOT use lifter until you read and understand this entire manual.
- DO NOT modify this lifter. Unauthorized modifications might make it unsafe to use and automatically void the limited warranty (see p. 4).
- DO NOT remove or obscure any label.
- Secure load to pallet BEFORE using this lifter.

RECEIVING INSTRUCTIONS

Every unit is thoroughly inspected prior to shipment. However, it is possible that the unit may incur damage during transit. If damage is noticed when unloading, make a note of it on the BILL OF LADING. Remove all packing and strapping material, then inspect the unit again for damage. IF DAMAGE IS EVIDENT, FILE A CLAIM WITH THE CARRIER IMMEDIATELY!
OPERATION

This lifter is designed for use with closed bottomed skids and pallets. All loads lifted with this device must be secured to the skid and be symmetrically distributed on the skid. Loose items might cause the center of gravity to shift which could cause the entire load to fall off of the forks.

Insert the forks of the lifter through the fork slots in the pallet until the forks are fully inserted. If the beam height needs to be adjusted, first remove the height adjustment pin. Then, either adjust the height by connecting a hoist to the bail and lifting it, or adjust the height by hand. After setting the height, reinstall the height adjustment pin and secure it in place with the hitch pin.

Set the bail adjustment pin so that the bail is located above the center of the load. Be sure all pins are in place and the safety pins are inserted into the pins. Connect the hoist hook through the bail pickup loop on the pallet lifter. Be sure that the hoist has a safety latch to insure the hook cannot slide off the bail. When moving the pallet lifter empty, the bail will return to the lower position. To be sure the bail does not slide forward, place the bail adjustment pin into the first adjustment hole (see diagram to the left).

Using the overhead hoist, slowly raise the pallet lifter and load. Check for load balancing and stability. If the load is not balanced position the pallet on the forks and retry. Never extend the pallet past the edge of the forks. Never extend the pallet past the edge of the forks. If the pallet center balance is off enough, the bail stop pin may need to be repositioned.

When trying to position the pallet lifter with the load, use the handles located on the rear of the unit. Never place your feet underneath the unit when positioning the load. To remove the pallet from the lifter, place the load on the ground and with the lifter slightly raised remove the pallet lifter from the rear of the pallet. When the weight of the pallet has been removed from the forks, the pallet lifter bail will slide back and allow the lifter to balance when unloaded.

INSPECTIONS

This lifter is built in accordance with relevant parts of ASME standard B30.20. A copy of this standard should be purchased from ASME.org. Guidelines for testing as well as inspections are provided in this standard.

Frequent inspections should be preformed on this unit to confirm normal operating condition. The intervals between inspections should be determined by the frequency of use. Inspect for cracked welds, worn or damaged components or torn or damaged warning labels.

LIMITED WARRANTY

Vestil Manufacturing Corporation ("Vestil") warrants this product to be free of defects in material and workmanship during the warranty period. Our warranty obligation is to provide a replacement for a defective original part if the part is covered by the warranty, after we receive a proper request from the warrantee (you) for warranty service.

Who may request service?
Only a warrantee may request service. You are a warrantee if you purchased the product from Vestil or from an authorized distributor AND Vestil has been fully paid.

What is an "original part"?
An original part is a part used to make the product as shipped to the warrantee.

What is a “proper request”?
A request for warranty service is proper if Vestil receives: 1) a photocopy of the Customer Invoice that displays the shipping date; AND 2) a written request for warranty service including your name and phone number. Send requests by any of the following methods:

Mail
Vestil Manufacturing Corporation
2999 North Wayne Street, PO Box 507
Angola, IN 46703

Fax
(260) 665-1339

Email
sales@vestil.com

In the written request, list the parts believed to be defective and include the address where replacements should be delivered.

What is covered under the warranty?
After Vestil receives your request for warranty service, an authorized representative will contact you to determine whether your claim is covered by the warranty. Before providing warranty service, Vestil may require you to send the entire product, or just the defective part or parts, to its facility in Angola, IN. The warranty covers defects in the following original dynamic components: motors, hydraulic pumps, electronic controllers, switches and cylinders. It also covers defects in original parts that wear under normal usage conditions ("wearing parts"), such as bearings, hoses, wheels, seals, brushes, and batteries.

How long is the warranty period?
The warranty period for original dynamic components is 1 year. For wearing parts, the warranty period is 90 days. The warranty periods begin on the date when Vestil ships the product to the warrantee. If the product was purchased from an authorized distributor, the periods begin when the distributor ships the product. Vestil may, at its sole discretion, extend the warranty periods for products shipped from authorized distributors by up to 30 days to account for shipping time.

If a defective part is covered by the warranty, what will Vestil do to correct the problem?
Vestil will provide an appropriate replacement for any covered part. An authorized representative of Vestil will contact you to discuss your claim.

What is not covered by the warranty?
1. Labor;
2. Freight;
3. Occurrence of any of the following, which automatically voids the warranty:
   - Product misuse;
   - Negligent operation or repair;
   - Corrosion or use in corrosive environments;
   - Inadequate or improper maintenance;
   - Damage sustained during shipping;
   - Collisions or other incidental contacts causing damage to the product;
   - Unauthorized modifications: DO NOT modify the product IN ANY WAY without first receiving written authorization from Vestil. Modification(s) might make the product unsafe to use or might cause excessive and/or abnormal wear.

Do any other warranties apply to the product?
Vestil Manufacturing Corp. makes no other express warranties. All implied warranties are disclaimed to the extent allowed by law. Any implied warranty not disclaimed is limited in scope to the terms of this Limited Warranty.
